

Observable

AVLTree< ContentType >

ObservableAVLTree< ContentType >

```
classDiagram
    class Observable
    class AVLTree["AVLTree< ContentType >"]
    class ObservableAVLTree["ObservableAVLTree< ContentType >"]
    ObservableAVLTree --|> Observable
    ObservableAVLTree --|> AVLTree
```

The diagram illustrates a class hierarchy where `ObservableAVLTree< ContentType >` is a subclass of both `Observable` and `AVLTree< ContentType >`. This is represented by two arrows pointing from the bottom class to the top two classes.
